

SUMMARY

Full Stack Software Engineer and consultant with experience in JavaScript and Python based programming. With a background in mechanical engineering and operations, I have a can-do attitude and bring strong skills in problem-solving, communication and collaboration. As a lifelong learner, I continuously work on growing my technical knowledge. I enjoy tackling challenges head-on and crafting creative solutions to real-world problems. My belief in the power of teamwork guides me in achieving exceptional results.

PROJECTS

WriteWell– [GitHub](#) | [Demo](#) | [Live](#)

- A full-stack app that enables bloggers to share, edit, and delete blogs.
- Built with Next.js for the front end and styled with scss.
 - Employed Next.js routing ability to construct endpoints for API requests.
 - Utilized MySQL as the database, which is deployed on AWS RDS.
 - Used AWS S3 to save all images and linked it to the database.
 - Being in-progress for responsive design.

Portfolio – [GitHub](#) | [Demo](#) | [Live](#)

- A digital showcase of my professional journey, highlighting my skills and projects.
- Employed Next.js with Tailwindcss to design the app as a single page.
 - Incorporated interactive elements and animation using Framer motion.
 - Maintained DRY coding following best practices in all the project files.

GPT-3 Intro – [GitHub](#) | [Demo](#) | [Live](#)

- A landing page created to describe GPT-3 technology that provides a brief introduction about this modern AI technology.
- Built with ReactJS and CSS styling showcasing an appealing user experience.
 - Utilized BEM (Block Element Modifier) technique to relate JSX elements to styling.
 - Deployed JSON server as the backend server.

Budget Tracker CLI – [GitHub](#) | [Demo](#)

- A command-line application designed to help you manage your finances and track your expenses easily.
- Employed python scripts and functions and maintained DRY coding.
 - Utilized SQLAlchemy for database management.
 - Implemented the rich library for a user-friendly CL interface.

SKILLS

Programming Languages

JavaScript – Python – MatLab

Front-end

HTML – CSS – React.js – Next.js – Sass

Back-end

Flask – FastAPI

Database

SQLite3 – MySQL – PostgreSQL

Source Controls and Tools

Git – GitHub – VSCode – Linux WSL

EDUCATION

Full-Stack Web Development Bootcamp

Flatiron School

Feb 23 – Oct 23

MEng. Mechanical Engineering

University of Guelph

GPA: 91% (Course-based)

Jan 19 – Feb 21

MSc. Mechanical Engineering

King Fahd University of Petroleum & Minerals

GPA: 3.95/4.00 (Thesis-based)

Sep 16 – Dec 18

BSc. Mechanical Engineering

King Fahd University of Petroleum & Minerals

GPA: 3.92/4.00

Jan 12 – May 16

LANGUAGES

Arabic (Native)

English (Professional)

INTERESTS

Chess – Tennis – Table Tennis – Soccer
